SUMMARY

Backend engineer with 3+ years designing, building, and scaling production services and RESTful APIs (primarily Python, also Go), owning the full lifecycle from system design and database schema through deployment, monitoring, and test coverage. Recent work has centred on PostgreSQL schema design, performance tuning, event-driven services, and pipeline orchestration on Linux.

EXPERIENCE

- Software Engineer** Feb 2026 – Present
Visiwise | Calgary, Canada *Full-time | Remote*
 - Built and maintained RESTful backend APIs in Python over PostgreSQL, owning endpoint and schema design.
 - Integrated third-party data sources into backend services with scheduled sync and failure handling.
 - Automated daily reporting, replacing a manual process with a scheduled backend job.
- Software Engineer** Dec 2024 – Feb 2026
Holoo Software Company | Tehran *Full-time*
 - Re-architected legacy data pipelines with Dagster, cutting processing time by 60% and improving reliability.
 - Profiled and optimized a core microservice, reducing steady-state CPU usage from 80% to 40%.
 - Wrote comprehensive integration tests for backend services, reaching 70% coverage.
 - Delivered 20+ user stories across quarterly and sprint planning, contributing in retrospectives.
- Backend Developer** Nov 2023 – Nov 2024
Sokan Invest | Tehran *Full-time*
 - Built high-performance FastAPI REST APIs for real-time financial dashboards analyzing 1M+ data points.
 - Owned database design for a backtesting microservice (PostgreSQL/TimescaleDB), modelling time-series schemas and indexes.
 - Built an automated trading bot handling real-time market data with PostgreSQL persistence.
- Python Backend Developer** Feb 2023 – Nov 2023
Pomechain | Abu Dhabi *Full-time | Remote*
 - Designed and implemented a Django-based ML recommender system, increasing user engagement by 40%.
 - Built scalable Python data-sanitization pipelines, cutting preparation time by 63% at 99% accuracy.
- Data Scientist** Mar 2022 – Dec 2022
Jarfa Co. | Tehran *Full-time*
 - Engineered preprocessing pipelines and 40+ features over 2M+ insurance records (Python, SQL), improving fraud-detection precision/recall by 25%.

TECHNICAL SKILLS

Languages: Python, Go, SQL
Databases: PostgreSQL, Redis, MongoDB, MySQL, TimescaleDB — schema & index design, query optimization
Frameworks: Django & Django REST Framework, FastAPI
Architecture: System design, Data Structures & Algorithms, Microservices, Event-Driven, DDD, RESTful APIs, Design Patterns
Platform & Ops: Linux/Unix, Docker, Kafka, RabbitMQ, Dagster orchestration, Git, CI/CD, Prometheus, Grafana, Sentry
Testing & Docs: pytest, TestContainers, Locust, integration testing, technical documentation

EDUCATION

- M.Sc. Software Engineering** 2020 – 2023
Iran University of Science and Technology *Tehran, Iran*
- B.Sc. Statistics** 2014 – 2018
Alzahra University *Tehran, Iran*
